

Greens Update.

29th May 2020

Paul is going to order some more red stone for the path to the first tee. Its wearing a little thin in places.

We are getting a wood chipper in for the day to get rid of all the branches that were cut down during lockdown.

The winter greens will be kept white lined and prepared in plenty of time for winter golf.

The greens will be kept at 5ml during this hot weather to protect them from scorching.

A new bridge is being made for the new ditch on the 2nd. Hopefully that should arrive next week.

Paul is looking into having tee signs made to match the front nine, for the back nine.

Some more red posts need putting in and some bushes need cutting back where the posts have been covered. Mike is hoping to get this done A.S.A.P.

The old winter tee on the 6th has been seeded, but like the seeds in the pond, the filled in bunker on the 6th and the new turf they are desperate for water!!
